

Business Giving from Amazon Business

Give gifts, rewards, and stipends for everyday work supplies to employees, clients, and beneficiaries without the hassle of bulk ordering and managing reimbursement. Business Giving enables you to create and fund vouchers, curate a catalog of eligible items, invite recipients to select items, and view redemption progress — all in one place.

Business Giving makes it easy to create and manage vouchers and to deliver a personalized recipient experience without administrative burden.

Save time

Eliminate the need to collect information, order, unbox, organize, store, distribute, and deliver items, or track returns.

Maintain control

Create a custom catalog, determine item eligibility, manage recipient access, and allocate budgets.

Eliminate manual processes

Send recipients an e-invite to redeem their voucher and order their item using the Amazon checkout process. Recipients can also manage returns and access support through Amazon.

Flexible recipient experience

Recipients can choose items and variations (size, color, style) directly from the catalog and have the items delivered to their chosen location.

Streamlined funding process

Fund vouchers with your preferred payment method on your Amazon Business account. Any unused funds will be returned after your selected campaign end date.

Manage spend

Access campaign reporting and view remaining recipient balance. Set spending thresholds and add additional funds as needed.
