

# United Teleports

## Why United Teleports?

- 16 years of experience
- 2 facilities for downlink
- Rapid Deployment
- 24/7 Network Operations Center
- 24/7/365 Monitoring and Support

## Headend Replacement

*(recently acquired from Vubiquity)*

Seamlessly transition to a hosted headend, reducing Capex and Opex while delivering an identical channel lineup to your customers.

- Starts at just \$1.25/sub/month
- Reduce labor and equipment costs
- Blackout management
- Save electricity, AC needs and maintenance fees
- MPEG-2, MPEG-4 and streaming
- Fully redundant downlinks / nationwide POPs

## Streaming

*(Powered by peakVU.TV from Broadpeak)*

Future-proof your video offering by transitioning to broadband-delivered video service.

- Cost effective way to continue offering a video product
- BYOD – creates flexibility, reduces equipment support costs and labor
- Choose your middleware platform
- Supports coax or IPTV network
- Easy access to cloud-based VOD content
- Better use of your network – move video traffic to IP
- Reduced server requirements
- Blackout management
- Comprehensive channel lineup

## Broadband TV Service

Low-cost video offering for your broadband-only subscribers.

- Leverages NCTC's broadband package
- DTS Internet delivery
- Comprehensive lineup of FAST channels
- Extends delivery of content to mobile devices, laptops, etc.
