TiVo® Hospitality Solutions

TiVo Hospitality Solutions are designed to serve operators' commercial customers with an IPTV solution that best meets their needs. The solutions consist of an app-based Lite Client and a hardware solution. The Lite Client allows operators to provide their commercial customers with an app-based Managed IPTV service while the hardware solution, using Blonder Tongue's NXG Solution, is applicable for commercial customers who still have a heavy Radio Frequency footprint as it has the ability convert and decrypt IP ABR Streams to multiple output formats.

LITE CLIENT APPLICATION	HARDWARE
Allows commercial customers to access Live Linear, VOD, and Start-Over-Catchup content across many device platforms while de-personalizing the user experience to meet the needs of the short-term-stay hospitality market.	Translates modern streaming content by creating all signals necessary to support linear TV lineups in B2B/Hospitality and Multiple Dwelling Unit environments. It is cost effective and scalable as a headend or property-based solution.

Both solutions cover all primary distribution networks; including QAM/RF, Unicast or Multicast IP, Unicast IP Lite Client, or Pro-Idiom.

KEY MARKET SEGMENTS	CUSTOMER TYPES	CONTENT OPTIONS	NETWORK TYPE	FEATURES	CLIENTS AVAILABLE
COMMERCIAL/ SMALL BUSINESS	Dentist offices, nail shops, salons, bars, restaurants, etc.	**Linear** • Local Channels • National Cable Channels • Premium Channels • Music Channels • Sports	IP (Unicast)	• Linear • UX-EPG • VOD • SoCu	• Lite Client on Managed Android, Streamers (BYOD) & Smart TV's (BYOD) • Operator determines linear channel lineups for each property
			IP (Multicast)	• Linear Only	• Requires Blonder Tongue NXG edge device with client able to connect to and stream linear unicast channels from Edge Cache • Appropriate client devices to receive, decrypt and decode multicast streams
HOSPITALITY	Hotels, Hospitals, Inns, Nursing Facilities Timeshares	**Linear** • Local Channels • National Cable Channels • Premium Channels • Music Channels • Sports **On-Demand** • VOD (only FVOD/ SVOD)	IP (Unicast)	• Linear • SoCu and VOD • UX – EPG, Movies, Shows	• Lite Client on Managed Android, Streamers (BYOD) & Smart TV's (BYOD) • Operator determines linear channel lineups for each property
			IP (Multicast)	• Linear Only	• Requires Blonder Tongue NXG edge device with client able to connect to and stream linear unicast channels from Edge Cache • Appropriate client devices to receive, decrypt and decode multicast streams
			QAM/RF	• Linear Only	• Requires Blonder Tongue NXG edge device with client able to connect to and stream linear unicast channels from Edge Cache • Appropriate client devices to receive and decrypt QAM signal
MDU	Apartment complexes, condominiums, senior living facilities, universities, dormitories	**Linear** • Local Channels • National Cable Channels • Premium Channels • Music Channels • Sports **On-Demand** • VOD	IP (Unicast)		• Existing Managed Service offering • Billing setup per dwelling unit
			IP (Multicast)	• Linear Only	• Requires Blonder Tongue NXG edge device with client able to connect to and stream linear unicast channels from Edge Cache • Appropriate client devices to receive, decrypt and decode multicast streams
			RF	• Linear Only	• Requires Blonder Tongue NXG edge device with client able to connect to and stream linear unicast channels from Edge Cache • Appropriate client devices to receive and decrypt QAM signal
